#### Supplemental Information Disclosure Statement

Regarding the Supplemental Information Disclosure Statement ("IDS") and comments thereon filed by applicants together with their June 23, 2004 Amendment, the Examiner stated on page 2 of the Final Office Action that:

- 1. All of the foreign patents but only 3 U.S. patents and 2 PGPubs documents have been provided to the Office (citing Attachment A, "ePheonix" page, which lists U.S. Patent Nos. 6,107,019, 6,344,545, and 6,548,636, and U.S. Patent Publication Nos. 2003/0092632 and 2003/0228306.
- 2. Pages 21-23 of applicants' IDS are confusing and contradictory, citing, as examples, paragraphs marked C and D, of Attachment B (a marked-up copy of pages 21-23 of applicants' June 23, 2004 IDS). The Examiner asserted that the reference numbers, as filed, are incorrect, noting that paragraph G seems to contradict corrected paragraph C, and that paragraphs H, I, and J also seem to be incorrect. The Examiner also stated that clarification is required.
- 3. Only the references that have actually been provided to the Office have been considered. The Examiner stated that because of the confusing nature of the remarks concerning the references in the IDS, citations to references which were not provided have been lined through. The Examiner also stated that the lined-through references have been considered to the extent that they may be duplicates of the references provided.

In response, applicants note that they understand that the confusion concerning the reference citations referred to by the Examiner was resolved during a September 24, 2004 telephone conference between the Examiner and Ashton Delauney, Esq. of the undersigned's office. As was pointed out to the Examiner during

Serial No.: 09/825,615 Filed: April 6, 2001

Page 19

this telephone conference, the reference numbers cited by applicants on pages 21-23 of the June 23, 2004 IDS (paragraphs A-J of the Examiner's Exhibit B) accurately correspond to the numbered list of references provided on pages 17-21 of the IDS. However, apparent inconsistencies arose because the Examiner had incorrectly interpreted these reference numbers as corresponding to the Exhibit numbers included on the PTO-1449 form in the IDS. Applicants note that the reference numbers do not correspond to the Exhibit numbers, and maintain that the reference citations in the June 23, 2004 IDS are correct.

In this regard, the Examiner issued a September 27, 2004 Interview Summary acknowledging that the confusion surrounding the numbering of references had been clarified during the September 27, 2004 telephone conference. The September 27, 2004 Interview Summary also states that many of the references submitted by applicants in the June 23, 2004 IDS were not scanned by the Patent Office and hence have not been considered by the Examiner. The Interview Summary further states that check marks were used, in lieu of the Examiner's initials in the initials column of the PTO-1449 form, to indicate the specific references which have been considered by the Examiner.

Applicants maintain that they submitted copies of 36 references (Exhibits 1-36) in their June 23, 2004 IDS. In support, applicants attach hereto as **Exhibit A** a copy of the postcard which accompanied the June 23, 2004 IDS and which was returned to applicants' representatives by the Patent Office. This postcard states that copies of references (Exhibits 1-36) were submitted to the Patent Office, and confirms receipt of these references by the Patent Office, as evidenced by the Office's stamp bearing the June 25, 2004 date.

Serial No.: 09/825,615 Filed: April 6, 2001

Page 20

However, from the 36 copies of references submitted, copies of all 11 PCT International Applications submitted but only 3 U.S. patents and 2 U.S. published applications were made available to the Examiner due to problems internally within the Patent Office. Applicants attach hereto as **Exhibit B** a copy of the PTO-1449 form returned by the Examiner and containing check marks to indicate the references which had been made available to him.

Applicants also attach hereto as **Exhibit C** a copy of the PTO-1449 form originally filed in the June 23, 2004 IDS. For completion of the record, and notwithstanding the Examiner's statement in the September 27, 2004 Interview Summary that he has considered the checked references, applicants respectfully request that the Examiner initial and return a copy of the enclosed PTO-1449 (**Exhibit C**) in conformance with M.P.E.P. §609.

Applicants also submit herewith a Supplemental Information Disclosure Statement to disclose to the Examiner, inter alia, the references previously cited in the June 23, 2004 IDS but which were not made available to him. Accordingly, applicants direct the Examiner's attention to the following references which are listed on the attached Form PTO-1449 (Exhibit D), and certain of which are attached hereto as Exhibits 1-18.

November 18, 2004 (U.S. Serial No. 10/763,545, filed January 23, 2004) (Exhibit 17); and

26. Pending claims in G.P. Allaway et al., U.S. Serial No. 09/460,216, filed December 13, 1999 (Exhibit 18).

The Examiner is respectfully requested to make these references of record in the present application by initialing and returning a copy of the Form PTO-1449 attached hereto as **Exhibit D**.

37 C.F.R. §1.98(a)(2)(ii), as amended in the September 21, 2004 Final Rule, states that copies of U.S. patents and published patent applications need not be submitted to the Patent Office in an Information Disclosure Statement unless required by the Office. Therefore, pursuant to 37 C.F.R. §1.98(a)(2)(ii), copies of the above-cited U.S. patent application publications (references 1 and 2) are not attached hereto.

C.F.R. \$1.98(a)(2)(iii)provides that an Information Disclosure Statement shall include, for each cited pending U.S. application, a legible copy of the application specification including the claims and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion. Under 37 C.F.R. \$1.98(c), when the disclosures of two or more patents or publications listed in an Information Disclosure Statement are substantively cumulative, a copy of one of the patents or publications may be submitted without copies of the other patents or publications, provided it is stated that these other patents or publications are cumulative. In accordance with 37 C.F.R. \$1.98(c), copies of some of the references listed above are not submitted herewith as they are cumulative.

Specifically, U.S. Serial No. 09/888,938, filed June 25, 2001 and

Serial No.: 09/825,615 Filed: April 6, 2001

Page 24

published October 24, 2002 as Application Publication No. 2002/0155429 A1, is a continuation of U.S. Serial No. 10/831,823, filed April 2, 1997, which issued as U.S. Patent No. 6,344,545 B1. A copy of U.S. Patent No. 6,344,545 B1 was submitted to the Patent Office as Exhibit 2 in the IDS filed June 23, 2004 in connection with the present application and has been considered by the Examiner. Therefore, a copy of U.S. Application Publication No. 2002/0155429 is not attached hereto. However, in accordance with 37 C.F.R. \$1.98(a)(2)(iii), a copy of the claims pending in Application Publication No. 2002/0155429 is attached hereto as Exhibit 1.

U.S. Serial No. 10/323,314, filed December 19, 2002 is a continuation of U.S. Serial No. 09/796,202, filed February 28, 2001, which issued as U.S. Patent No. 6,548,636 B2. A copy of U.S. Patent No. 6,548,636 B2 was submitted to the Patent Office as Exhibit 3 in the IDS filed June 23, 2004 in connection with the present application and has been considered by the Examiner. Therefore, a copy of U.S. Serial No. 10/323,314 is not attached hereto. However, in accordance with 37 C.F.R. \$1.98(a)(2)(iii), a copy of the claims allowed in U.S. Serial No. 10/323,314 is attached hereto as Exhibit 2.

U.S. Serial No. 09/852,238, filed May 9, 2001 and published May 6, 2004 as Application Publication No. 2004/0086528 A1, is a continuation of 09/724,105, filed November 28, 2000, which is a continuation of U.S. Serial No. 08/874,618, filed June 13, 1997 (reference 13). Therefore, copies of U.S. Serial No. 09/724,105 and Application Publication No. 2004/0086528 are not attached hereto. However, in accordance with 37 C.F.R. \$1.98(a)(2)(iii), copies of the claims pending in U.S. Serial No. 09/724,105 and Application Publication No. 2004/0086528 are attached hereto as Exhibits 9 and 10, respectively.

U.S. Serial No. 10/763,545, filed January 23, 2004 and published November 18, 2004 as U.S. Application Publication No. 2004/0228869 A1, is a continuation U.S. Serial No. 09/594,983, filed June 15, 2000 (reference 19). Therefore, a copy of U.S. Application Publication No. 2004/0228869 is not attached hereto. However, in accordance with 37 C.F.R. \$1.98(a)(2)(iii), a copy of the claims pending in Application Publication No. 2004/0228869 is attached hereto as Exhibit 17.

U.S. Serial No. 09/460,216, filed December 13, 1999, is a national stage application of PCT International Application Publication No. WO 98/56421, published December 17, 1998. A copy of WO 98/56421 was submitted to the Patent Office as Exhibit 30 in the IDS filed June 23, 2004 in connection with the present application and has been considered by the Examiner. Therefore, a copy of U.S. Serial No. 09/460,216 is not attached hereto. However, in accordance with 37 C.F.R. \$1.98(a)(2)(iii), a copy of the claims pending in U.S. Serial No. 09/460,216 is attached hereto as Exhibit 18.

References 5 and 6 are cumulative to each other since each contains an identical disclosure. Therefore, a copy of reference 6 is not attached hereto.

References 7 and 8 are cumulative to each other since each contains an identical disclosure. Therefore, a copy of reference 8 is not attached hereto.

References 10 and 11 are cumulative to each other since each contains an identical disclosure. Therefore, a copy of reference 11 is not attached hereto.

References 16, 17 and 18 are cumulative to each other since each contains an identical disclosure except that reference 18

contains an additional paragraph at the beginning of the application claiming the benefit of an earlier application, U.S. Provisional Application No. 60/112,532 (reference 17), and also provides the ATCC Accession Number for the PA10 antibody, which Accession Number is not provided in references 16 and 17. Therefore, copies of references 16 and 17 are not attached hereto.

References 23 and 24 are cumulative to each other since each contains an identical disclosure. Therefore, a copy of reference 24 is not attached hereto.

In accordance with their duty of disclosure under 37 C.F.R. \$1.56, applicants also direct the Examiner's attention to the following references which are listed on the attached Form PTO-1449 (Exhibit  $\hat{\mathbf{E}}$ ), and certain of which are attached hereto as Exhibits 19-21.

- 27. U.S. Patent No. 5,994,515 A, issued November 30, 1999 to J.A. Hoxie;
- 28. U.S. Patent No. 6,759,519 B2, issued July 6, 2004 to Y. Li and S. M. Ruben;
